Research & Development Pvt Ltd.

ATAL Tinkering Lab

Proud to be a part of Global **STEM** revolution

ABOUT US

Propeller Technologies is an Edu-tech, Research and Development based organization since 2014. We are one of the top 10 STEM Education Organizations in India. Our track record of excellence goes with 6 years of quality service, catering to the technology needs of 150+ educational institutions, installing Tinkering labs and training the students and teachers to impart technological skills.

To overhaul education and inculcate the spirit of innovation in children (as envisioned by NITAayog), we setup Atal Tinkering Labs in schools. The idea is to acquaint students with various innovative technologies so that they can come up with creative solutions to problems.

Our vision is “Together we create makers of the world” by marching towards a par excellence in STEM education.

Meet Our Core Team

Missioned with a Vision, the newly amalgamated Core Team is very dynamic, diverse, directional, dedicated and determined in translating new world ideas into action, driven by an intrinsic motivating factor of being a catalyst in architecting the 21st century world.

Smart Cleaning Bot

The 2-in1 robot vacuum brings along cleaning and mopping capabilities and comes with Alexa and Google Assistant voice command support. The small, round-shaped robot vacuum and mop is claims to clean hard-to-reach corners, and areas under beds and cupboards as well. It integrates Smart Dynamic Navigation technology (gyro navigation) and path tracking sensor, which claims to help in accurate route planning and methodical movement for greater room coverage and reduced cleaning time.

Now, a 'smart dustbin'

Katharine Aravind
HINDU, JAN 16, 2020, PAGE 19
PHOTO: JAN 16, 2020, PAGE 19

A group of students from Government Girls Higher Secondary School have devised a smart dustbin that dispense the recycling value of biodegradable waste. The initiative will help the people engage the waste. The initiative was made by the students of an AtalTinkeringLab in Erodel. The students are part of the AtalTinkeringLab ecosystem.

Atal Tinkering Lab was launched by Atal Innovation Mission (AIM), MoE, using a system government initiative to promote innovation and entrepreneurship in students. Through this lab, students would get access to modern tools and technologies such as the Internet of Things, robotics, and the personal files which are essential to these activities for their education.

Aravind Aravind, founder of a tech-startup company based in Trichy offered his expertise training 400 students from 100 AtalTinkering Labs that are part of the lab. The project has students preparing to explore about and promote and enhance the problems faced by the society, Mr. Aravind said.

All part of this project, students of Erodel school - Govt Girls Higher Secondary School, Erodel, Government Girls Higher Secondary School.

Government - launched a smart dustbin. The bin features of the dustbin is that when waste is dropped into it, it is single and value or being sold to a recycling plant would be determined.

Work on the project began in 2018, and Mr. Aravind. It is a three-month project. The children were research, understand the design, make a prototype, and if it is an idea and then apply for patents. We understand the vital role and how the dustbin or trash can enhance the society and help reduce the waste in the society, he said.

The students plan to spread the AtalTinkeringLab to help spread the innovation and entrepreneurship.

Govt school trio to represent TN in robotics event

If they win the competition, they will represent India at the South-Asia level

Published: 05th November 2019 06:37 AM | Last Updated: 05th November 2019 06:37 AM

Students from Government School, Alangudi have won State robotics competition will be representing Tamil Nadu at the nationals | EXPRESS

By Sushmitha Ramakrishnan
Express News Service

CHENNAI: Three children of daily wagers, studying in a government school in Pudukottai, who have won the State-level competition, will be representing Tamil Nadu at the nation-level robotics competition, IRC League- Bot Olympics, to be held in the third week of November.

If they win the competition, they will represent the country at the South-Asia level. S Nishanth, G Sivaneswaran and Daniel Joseph from the Government Boys Higher Secondary School, Alangudi in Pudukottai had built and programmed a line follower robot for the State-level robotics competition held in Virudhunagar on Saturday. They had programmed a technique, through which the bot could differentiate among various colours and travel along the lines of a designated colour.

"The students had also developed codes to make the bot perform 'pick-and-place' tasks along that route, and then switch to another colour route depending on how you programme it," said Umar Mohamed, physics teacher of the students. Such robots are used in manufacturing industries and in state-of-the-art warehouses of e-commerce giants such as Amazon to pick up items from storage based on orders.

The robot was made, using equipment supplied by the Centre from the Atal Tinkering Labs. Mohamed said girl students were not able to participate as much as their male counterparts as their parents did not allow them to stay back in school after classes or take them to competitions outside the village. Speaking to Express,

Atal tinkering lab to come up at Manaparai school

A school at Manaparai in Tiruchirappalli has been chosen for establishment of Atal Tinkering Laboratory (ATL) under the initiative of the Central Government. The project envisages creating the scientific temper and cultivating the spirit of curiosity and innovation in young minds. The Centre has allotted Rs. 10 lakh to Thanjai A High Secondary School for establishing the ATL in a 100-sq-ft building. The school has to procure various tools systems for the students to make creative and innovative projects. C Ramamoorthy Desai, Project Director, CA Business Solutions, who will function as a Mentor Of Change for the ATL Programme, said. Last week, the school on creation of the laboratory was visited by school headmaster L. Krishnan. A demonstration on how 3D printing Robot assembly kit to make easy was, the headmaster said. The tinkering kit allows students to transform into arrangements. The Central Government has already established a number of incubation centres for promotion of innovative projects, for Manaparai District.

Vox Pop of our ATL clients:

- 🎤 Propeller Technologies have been the great guidance and support in every project and competition. Your positive attitude has helped us all stay motivated.
(Dharshini Priya – SCM Higher Secondary School)
- 🎤 Thanks for giving the great service and consistent mentoring in an efficient way. In difficult environment, your training was still very effective and informative.
(Jaswanth - Maharishi School of Excellence)
- 🎤 Propeller Technologies helps me to implement the ideas in a very effective way. It is great, the way you were doing the training session with the students is very useful.
(Shanmuga Priya – Everest Mariappa Nadar Higher Secondary School)
- 🎤 One of the things I admire about Propeller Technologies is their ability to handle the students in a positive and energetic way. Thanks for engaging us all time with clear concise and great delivery.
(Krishna Kumar – P J Gupta High School)
- 🎤 Propeller Technologies did a great job of by recognizing the young scientist in an auspicious way and thanks for giving attention to every detail.
(Lingesh kumar – Aruna Higher Secondary School)
- 🎤 Thank you for the seamless training and giving us a great learning experience in an impactful way. Your way of teaching helps us to understand the concept in a simple form.(Hasini – Dharani Matriculation Higher Secondary School).
- 🎤 Action speaks louder than words, and your constant enthusiastic presence made us to explore more into the World of Science.
(Samson Reyas- Blessings Matriculation Higher secondary school)
